

Superplast® 300

Superplast® 300 : A patented mould steel that meets or exceeds standards for grades W 1.2311 and W 1.2738.

Material properties

Prehardened steel for medium and very large - size moulds and tools with good machinability. Consistent texturing and polishing improved by **very low sulphur content and hardness homogeneity**. Reliable repair welding and high thermal conductivity.

For which tools

Plastic injection mould cores and cavities, large - size moulds for bumpers, dashboards, television panels, bottle crates, etc.

For which plastics

Thermoplastics, thermosetting plastics, (PE, PP, PS), transparent melts. Injection moulding, compression moulding, RIM moulding, etc.

PROPERTIES

THROUGH HARDENABILITY

Thanks to an optimal balance of alloying elements (especially Boron metallurgy) and high quality heat treatment, Superplast® 300 exhibits a **very consistent hardness through large sections**. On the opposite the hardness of standard W 1.2738 is highly heterogeneous from surface to core.

A hardness delta of max 30HB all over the block is guaranteed.
